HeartSine Defibrillators

Sudden Cardiac Arrest (SCA) can happen to anyone, anywhere, at any time. When it happens, HeartSine's Automated External Defibrillator technology can make the difference between life and death.

Automated external defibrillators (AEDs) can be used by minimally trained bystanders to increase the survival rate for SCA by up to 75 percent by delivering a lifesaving shock within the first few minutes of an attack. These portable devices can be found in public places, such as shopping malls, golf courses, businesses, airports, airplanes, casinos, convention centers, hotels, sports venues, and schools. However, AEDs are still not widely available.

RRP: \$2995 Our Price: \$2795
